JESSICA PIVOTED FROM ANALYST TO ACTUARY FOR THE IDEAL CAREER MATCH

You know GEICO for insurance. Get to know us for great careers, too.

After starting at GEICO as an Analyst, Jessica never expected she’d find her calling as an Actuary. Support from management made the career switch seamless, just like that time she ball-girled for Andre Agassi at a tennis tourney.
Start your GEICO career as an Actuary.
Actuaries are vital members of GEICO’s team. A wide range of important decisions are based on their projections and professional opinions. GEICO's Actuarial Assistants analyze data to make decisions that enable our company to properly manage risk. A typical day may include analyzing premium and loss data, using statistical programs, evaluating results for reasonability and collaborating with various teams to achieve results.

Do more than crunch numbers
Our actuaries tackle a variety of business issues:
• Forecasting and assessing industry trends
• Setting rates for various insurance products
• Determining companywide reserves
You’ll work on teams, give presentations and interact with other departments throughout the company. Many actuaries get experience in both Pricing and Reserving to develop well-rounded company and career perspectives.

We hire driven professionals with:
• A Bachelor’s degree in math, economics, actuarial science or related field
• A cumulative and in-major GPA of at least 3.0 and 3.2, respectively
• Proven quantitative, analytical and problem-solving abilities
• Highly effective communication skills
• Strong computer skills, including Excel and some programming knowledge
• Demonstrated leadership potential
• At least one actuarial exam, and a commitment to take and pass the remaining CAS exams
• A desire to live in the Washington, DC, area

If your goal is to become a Casualty Actuarial Society (CAS) Fellow, we’ll help you achieve it! An important part of an Actuary’s career is advancing through a series of exams offered by the CAS. GEICO is committed to supporting your professional aspirations and provides:
• Up to 115 paid study hours per exam
• Opportunities to take review courses
• On-site quiet rooms for studying
• Financial support for the CAS exam program
• A program coordinator to assist with exam processes
As you pass exams, you may be eligible for raises and bonuses.

YOU THINK YOU KNOW US, BUT YOU’LL FIND YOUR CAREER EXPERIENCE AT GEICO PLEASANTLY UNEXPECTED.
