Rob left his small town to attend a small college, where he learned at a career fair that he could do big things in tech at GEICO. He moved to DC, started his career in the Technology Development Program in IT Sales and joined a local crew team.
Get to know GEICO for great tech careers, too.

Accelerate your career in tech at GEICO, applying what you learned in college in our three-year rotational program:

- Choose between our Software Development, Systems Analyst or Infrastructure Engineer tracks
- Dig deep into code to create and refine applications for our customers
- Enhance your technical project management and communication skills, improve programming, networking, software engineering, analysis, and database skills
- Analyze and propose improvements to design solutions and business requirements to optimize internal efficiency and enhance customer experience
- Work with a mentor from IT management and interact with IT executives
- Attend business conferences, hackathons and tech summits
- Refine skills with on-site boot camps and IT training
- Get involved in community service projects and social events

We hire driven IT professionals with:

- A Bachelor’s degree in Computer Science or related field
- A cumulative GPA of at least 3.0
- Coursework or related experience using Java, .NET, iOS, Android or C# technologies
- Strong analytical, problem-solving and communication skills
- Well-rounded experiences outside of the classroom
- A desire to work and live in the Washington, DC, area
- Authorization to work in the United States; sponsorship is not available

Your path to a real tech career at GEICO:

**DESIGN**

- Create user interfaces
- Utilize cutting-edge technology to improve UX/UI

**DEVELOP**

- Design, develop and test GEICO’s core systems
- Use iOS, .NET, Java, Android, C# and HTML, HTML5, CSS and Javascript tools to create high-level systems

**ANALYZE**

- Collaborate with customers, architects and developers
- Create high-level system designs

**ENGINEER**

- Design and maintain infrastructure
- Build and maintain GEICO’s data centers and extensive networks
